

## USER GUIDE – MEMCACHED SESSION IN MAGENTO

Memcache in magento version 2.3. has stopped working.

Example error:

```
main.CRITICAL: Warning: SessionHandler::read():
open(127.0.0.1:11211/sess_f56733b831d6321752b41db7382b9d08, O_RDWR) failed: No such file or
directory (2) in ../vendor/magento/framework/Session/SaveHandler/Native.php on line 22
{"exception":"[object] (Exception(code: 0): Warning: SessionHandler::read():
open(127.0.0.1:11211/sess_f56733b831d6321752b41db7382b9d08, O_RDWR) failed: No such file or
directory (2) in ../vendor/magento/framework/Session/SaveHandler/Native.php on line 22 at
../vendor/magento/framework/App/ErrorHandler.php:61)"} []
```

This package allows you to use memcache for session storage, which makes your magento much faster.

1. Set up package in AT-Connect
2. Install package
3. Configure

### 1. Set up package in AT-Connect

#### This package is for free

However, in our licencing server, we require you to go through the validation process.

Visit package page:

[https://connect20.aveo-trade.cz/Content\\_Cat:BuyPackage/details=1/extension=atconnect%2Fmagento-two-memcached-session](https://connect20.aveo-trade.cz/Content_Cat:BuyPackage/details=1/extension=atconnect%2Fmagento-two-memcached-session)

Click on Buy button

Because the package is free, it will be added to your products.

Set up IP address and composer key.

IP address is the address from which your server is communicating outside. You can see how to obtain this address here:

#### [How do I find the IP address of my server?](#)

[https://connect20.aveo-trade.cz/Content\\_Cat:Content\\_FAQ#ID4af87a650409d5c4a4f5cb3342a457b4](https://connect20.aveo-trade.cz/Content_Cat:Content_FAQ#ID4af87a650409d5c4a4f5cb3342a457b4)

### 2. Install package

Run these commands in command line:

```
composer config repositories.atconnect composer https://connect20.aveo-trade.cz
```

```
composer require atconnect/magento-two-language-sk-sk:2.*
```

```
$ composer require atconnect/magento-two-memcached-session:2.*
./composer.json has been updated
Loading composer repositories with package information
Updating dependencies (including require-dev)
 - Installing atconnect/magento-two-memcached-session (2.3.1.1-stable)
   Downloading: 100%

Writing lock file
Generating autoload files
```

If you receive this error, your api key, ip address or licence is invalid.

```
$ composer require atconnect/magento-two-memcached-session:2.*
./composer.json has been updated
Loading composer repositories with package information
Updating dependencies (including require-dev)
Your requirements could not be resolved to an installable set of packages.

Problem 1
 - The requested package atconnect/magento-two-memcached-session could not be found in any version, there may be a typo in the package name.

Potential causes:
 - A typo in the package name
 - The package is not available in a stable-enough version according to your minimum-stability setting
   see <https://getcomposer.org/doc/04-schema.md#minimum-stability> for more details.

Read <https://getcomposer.org/doc/articles/troubleshooting.md> for further common problems.

Installation failed, reverting ./composer.json to its original content.
```

problems.

Installation failed, reverting ./composer.json to its original content.
```

1. Verify if you have configured repository: repositories.atconnect
2. Verify if you have valid licence, and your ip address and api key is set

### 3. Configure

app/etc/env.php

```
'session' => [  
    'save' => 'memcached'  
],
```

If you will use default ip and port, you dont need to update magento configuration:

```
php bin/magento config:set session/memcached/host 127.0.0.1  
php bin/magento config:set session/memcached/port 11211
```
